

Emer-Clad® Fabric Reinforcing Tape

Technical
Data
Sheet

Non woven reinforcement fabric

Uses

Emer-Clad Fabric Reinforcing Tape is a non woven fabric designed for use with liquid membrane and high build coating products for enhancing reinforcement, tensile strength and uniform layers in liquid membrane applications. This fabric has been designed to easily wet into high build liquid membranes, preventing the creasing and wrinkle phenomena often found with general glass fibre and other reinforcement matting materials. Suitable for both vertical and horizontal applications, the tape displays outstanding workability and provides excellent rupture and rot resistance.

Advantages

- Excellent resistance to detergents, bleaches, chemicals and water
- Ease of use with liquid membranes, preventing wrinkling and excessive creasing
- Rot resistant, suitable in wet areas, external areas, underground and immersed areas
- Durable when reinforced within liquid coating
- Conforms well to substrate surfaces, returns and abutments
- Light weight
- Material weight – 40g/m²

Application Instructions

Product can be cut with scissors, knife or similar cutting tools.

Apply a generous coating of the liquid membrane being used to the substrate where the reinforcing tape is to be applied and while in a wet state embed the fabric into position. Do not allow liquid membrane to tack off or skin before embedding fabric.

Air pockets or creases formed can be removed with a flat spatula or brush.

Subsequent coats of the liquid membrane should ensure the total fabric is covered and fully encapsulated.

Supply

Roll Length:	50m
Available Widths:	100mm, 1.2 metre
Product Codes:	100 mm - FC000937-UNIT 1.2 metre - FC000940-UNIT

Important notice

A Safety Data Sheet (SDS) and Technical Data Sheet (TDS) are available from the Emer website. Read the SDS and TDS carefully prior to use as application or performance data may change from time to time. In emergency, contact any Poisons Information Centre (phone 13 11 26 within Australia) or a doctor for advice.

Product disclaimer

This Technical Data Sheet (TDS) summarises our best knowledge of the product, including how to use and apply the product based on the information available at the time. You should read this TDS carefully and consider the information in the context of how the product will be used, including in conjunction with any other product and the type of surfaces to, and the manner in which, the product will be applied. Our responsibility for products sold is subject to our standard terms and conditions of sale. Parchem does not accept any liability either directly or indirectly for any losses suffered in connection with the use or application of the product whether or not in accordance with any advice, specification, recommendation or information given by it.
